

Town of Longboat Key Storm Water Drains/Outfalls Longbeach Village Maintenance Schedule

Quarterly inspections and clean-up of Storm Water Drains/Outfalls occur in January, April, July and October.

Quarterly Inspections and clean-up include:

1. Flapper valves checked for barnacles and sediment; barnacles/sediment removed
2. Boxes checked for sediment and trash; sediment and trash removed
3. Pipes checked for any blockage; pipes cleared if blocked
4. Structure tops lifted as required for extensive cleaning

Please note that:

1. Visual checks are also performed during significant rain events.
2. Quarterly street sweeping helps prevent debris from getting into storm drains.
3. Inspections and maintenance must be performed during low tide.
