The **horizontal** distance between the side lot lines measured along the minimum street setback (yard) line as required for the district in which it is located. at right angles to the lot depth along a straight line parallel to the front lot line at the minimum required setback at the front building setback line. Binding concept plans are required as part of outline development plans (ODP) that are submitted for planned unit development (PUD) approval, except where this code explicitly allows a final site development plan to replace a binding concept plan (see, for instance, sections 158.067(B)(1) and 158.180(F)). Binding concept plans become an integral part of ODP/PUD approvals.

(See section 158.009(L).)

"Density, maximum gross residential." The maximum allowable number of dwelling or tourism units per acre of gross land area, as determined by this Zoning Code. (See "Gross Land Area.")

"Departure." A departure is a type of formal modification of a standard or constraint of this code that may be approved by the town commission when considering an application for a planned unit development. A departure is not a variance and thus need not be predicated on conditions peculiar to the property or require a showing of unnecessary and undue hardship. See section 158.067(D).

"Golf course." A tract of land improved with tees, greens, fairways, and hazards and maintained for playing the game of golf. Golf courses with at least eighteen holes may contain accessory uses such as clubhouses, restaurants, shelters, and spas.

Lot coverage has the same meaning as building coverage and land coverage.

"Lot depth." The depth of a lot is the distance measured by a straight line from the midpoint of the front lot line to its intersection with the midpoint of the rear lot line, in the mean direction of the side line of the lot from the midpoint of the front lot line to the midpoint of the opposite mean rear line of the lot.

"Planned unit development (PUD)." A development review and approval process that allows approval of a conceptual site plan, known as a binding concept plan, prior to preparation and submission of a detailed engineered site plan known as a final site development plan. The PUD process also allows landowners to seek departures from certain provisions of this code at the conceptual design stage. The documents submitted for PUD approval are known as an outline development plan. PUD approval does not change a property's zoning district, but most density limits are reduced by section 158.070 and the terms of the outline development plan become binding on the property after PUD approval.

"Planning and zoning board." The Longboat Key Planning and Zoning Board, the legally constituted membership of the Planning and Zoning Board of Longboat Key, Florida, as referenced in this chapter and appointed by the town commission in accordance with chapter 33 of the town's code of ordinances.

A use that qualifies as a "pre-existing legal use" may also be classified as a nonconforming use, but by virtue of its listing in section 158.125, it will be afforded the privileges of a permitted use and may be reconstructed up to its pre-existing density in accordance with all applicable current regulations, but only on the specific parcel on which it is located.

"Site plan, final." A detailed site plan that must be approved by the town commission before building permits can be obtained for land uses listed as "Permitted uses with site plan review" in section 158.145. A final site plan is also known as a site development plan or final site development plan.

"Site development plan." Site development plan has the same meaning as final site plan.

"Variance." A variance is a type of formal modification of departure from the dimensional or numerical requirements of the zoning code where such variance will not be contrary to the public interest and where, owing to conditions peculiar to the property and not the result of the actions of the applicant, a literal enforcement of the chapter would result in unnecessary and undue hardship. Variances may be approved by the zoning board of adjustment or the planning and zoning board as authorized by this code. A variance is authorized only for height, area, and size of structure or size of yards and open spaces, due to conditions peculiar to the property and not the result of the actions of the applicant, where a literal enforcement of the chapter would result in unnecessary and undue hardship, to the extent that such variance is consistent with the comprehensive plan.

"Waiver." A grant of permission, which is authorized under this chapter that authorizes an applicant to deviate from specific standards or provisions of these regulations. Under the following circumstances, waivers may be granted in accordance with the cited code provisions:

- (1) For dredging, granted by the town manager or designee (section 152.06).

SECTION 8. Chapter 158, Section 158.009, *Description of districts and district policies*, subsection (L) is hereby amended as follows:

- (L) Mixed Use Community - Bay Isles (MUC-1), Mixed Use Community - Islandside (MUC-2), and Mixed Use Community - Promenade/Water Club (MUC-3). MUC districts allow ~~Allows~~ a mix of residential and nonresidential uses in planned communities developed through the planned unit development procedures and standards contained in section 158.065 through 158.071. Notwithstanding the terms of any other section of this Zoning Code related to the calculation of density for residential or tourism uses, density in each MUC district density is calculated on the basis of the average overall density of tourism and dwelling units per acre of all property included in the respective MUC district, including recreational areas, open space areas, road rights-of-way, wetland areas and other nonresidential lands. An updated land intensity schedule must be approved with each amendment to a MUC district. Clustered development patterns are encouraged and thus ~~the density of separate a specific parcel or~~ parcels within a given each MUC district may be more dense than exceed the average overall density of the MUC district.

ALTERNATIVE 1:	The approval of units into any MUC district beyond those units approved by resolution or ordinance prior to January 1, 2014, must be preceded by referendum approval in accordance with section 22 of article II of the town charter.
ALTERNATIVE 2:	The assignment of units into any MUC district beyond those units approved by resolution or ordinance prior to January 1, 2014, will be memorialized through the ODP/PUD process. The number of additional units assigned cannot exceed the assigned overall density for the entire MUC district.
ALTERNATIVE 3:	The approval of units into any MUC district beyond those units approved by resolution or ordinance prior to January 1, 2014, can be made only through the ODP/PUD process. Approval of additional units is not guaranteed, and in no case may the number of additional units exceed the assigned overall density for the entire MUC district.

~~Provided the total amount of nonresidential development does not exceed the maximums stated herein, designated nonresidential development may be relocated to other sites within the planned unit development and the types of approved nonresidential uses may be changed to other nonresidential uses. No boundary of any existing MUC district may shall be expanded to include additional lands unless contiguous to the boundaries of the MUC as it existed on December 31, 2010. Redevelopment may occur up to the maximum densities authorized for each MUC and consistent with the public health, safety and welfare, quality design, expanded recreational and open space amenities, and adequate public infrastructure and services. Within the acreage allocated for nonresidential uses, additional lot coverage and height may be authorized pursuant to section 158.067(E)(D)(3)(i) and (j).~~

~~Except for tourism units that may be authorized pursuant to Comprehensive Plan Policy 1.1.11 and the Town's 2008 referendum for adding 250 tourism units, the Town will not approve additional tourism units for land in the MUC-2 zoning district until the comprehensive plan has been amended to allow additional tourism units, an amendment that requires voter approval pursuant to Article II, §22 of the Town Charter.~~

~~A minimum of 50% of the total property within each the MUC district must shall be maintained in open space. Acreage for recreational uses is not limited. Any changes to existing land-use patterns require approval through the ODP/PUD process and must be in accordance with the schedule of uses in section 158.125 and must meet the locational and compatibility standards in section 158.067(C). The general mix of uses within the boundaries of each MUC district, as calculated prior to the application of the 50% open space requirement, is allocated as follows:~~

- (1) **Mixed Use Community – Bay Isles (MUC-1).** This **district category** encompasses the Bay Isles community approved by Resolution 75-27 as it has been and may be amended from time to time. **Average** Overall density within the boundaries of the MUC-1 **district must shall** not exceed 3.26 dwelling units per acre.

SECTION 9. Chapter 158, Section 158.065, *Purpose*, is hereby amended and retitled as follows:

Article III. Site and Development Plans

Division 1. Planned Unit Developments (PUD)

158.065 Purpose Overview of planned unit developments (PUD).

- (A) **Optional process.** Planned unit development (PUD) regulations provide an optional review and approval process for landowners who wish to develop or redevelop parcels in most zoning districts. In the MUC zoning districts, the PUD process establishes development rights on specific parcels, thus the PUD process is the only process that landowners in those zoning districts can use to request changes to the development plans for those parcels. The PUD process allows approval of a conceptual site plan, known as a binding concept plan, prior to preparation and submission of a final site development plan. The PUD process also allows landowners to seek departures from certain provisions of this code at the conceptual design stage. Landowners are bound by an approved binding concept plan when they submit final site development plans in accordance with section 158.067(F).
- (B) **Effect on zoning district.** The PUD process requires the submission of an outline development plan (ODP), which becomes an integral part of a PUD approval. Planned unit development approval does not change the underlying zoning district, nor does it add permitted uses to those specified for each zoning district in the table accompanying section 158.125, the schedule of use regulations.
- (C) **Where permissible.** PUD approval may be requested in any zoning district, provided the minimum area requirements in section 158.068 are met for the following zoning districts:
- (1) INS;
 - (2) R-1IP, R-1SF, R-2SF, R-3SF, R-4SF, and R-6SF;
 - (3) R-3MX, R-4MX, and R-6MX;
 - (4) MUC-1, MUC-2, and MUC-3;
 - (5) OI, C-1, C-2, C-3, and M-1; and
 - (6) T-3 and T-6.
- (D) **Density.** PUD approvals must comply with the special density provisions found in section 158.070.
- (E) **Intent.** The purpose of Planned unit developments (PUD) regulations are intended: is to: encourage flexibility in the design and development of land in order to promote its most appropriate use; to facilitate the adequate and economical provision of streets, utilities, and public spaces; and to preserve the natural and scenic qualities of open areas. The PUD application, review and approval

procedure is intended to permit diversification in the location of structures and improve circulation facilities and other site qualities while ensuring adequate standards relating to public health, safety, comfort, order, appearance, convenience, morals and general welfare, ~~both in the use and occupancy of buildings and facilities in planned groups.~~

- (F) **Site plans.** A PUD is approved through the adoption of an outline development plan (ODP), ~~which~~ Binding concept plans are required as part of outline development plans, except where this code explicitly allows a final site development plan to replace a binding concept plan (see, for instance, sections 158.067(B)(1) and 158.180(F)). Binding concept plans become an integral part of ODP and PUD approvals. Binding concept plans (and final site development plans) may be subsequently amended in accordance with the standards and procedures in section 158.067.

SECTION 10. Chapter 158, Section 158.067, Review and approval procedure, is hereby amended as follows:

158.067 Review and approval of planned unit developments procedure.

- (A) **Approving authority.** Planned unit developments ~~are a permitted use with review, and shall be~~ subject to the approval of the town commission after review and recommendation by the planning and zoning board and after public hearings are held by the town commission in accordance with law.
- (B) **Applications.** In order to provide an expeditious method for processing an outline development plan application for a planned unit development, under the terms of this chapter, it is hereby declared to be in the public interest that all procedures with respect to the ~~review,~~ approval or disapproval of a plan for a planned unit development, and the continuing administration thereof, shall be consistent with the following provisions:
- (1) **Application requirements.** An application for an outline development plan for a planned unit development, including full payment of an application fee as set forth by resolution of the town commission, shall be filed and signed by or on behalf of the landowner by an authorized agent, with the planning and zoning official. The purpose of the outline development plan is to provide the town with information with respect to the type, character, scale, and intensity of development as well as the time phasing of the proposed planned unit development in order for the town to evaluate the impact of the development to the town. Any application for outline development approval shall be submitted on a form provided by the town and in addition shall include at a minimum the following information, unless the planning and zoning official determines ~~in writing~~ that one or more of the following elements do not apply to the particular application:

- (a) **A scaled drawing delineating** the relationship of the site to existing development in the area, including streets, utilities, residential and commercial development, and important physical features in and adjoining the project, including ecological features.
- (b) **A scaled drawing delineating** the approximate location and dimensions of all boundary lines of the development, and of any contiguous lands, including those separated only by a street, canal or similar feature, in which the developer or property owner presently has any legal interest.
- (c) **A** verified statement, including a certificate of ownership, showing each and every individual person having a legal ownership interest in the subject property except publicly held corporations whose stock is traded on a nationally recognized stock exchange, in which case the name and address of the corporation and principal executive officers will be sufficient.
- (d) **A scaled drawing delineating** the approximate location, nature and extent of all existing easements, streets, buildings, land uses, zoning, tree groupings, watercourses, **uplands, wetlands,** and topographic contours (i.e., at six-inch intervals with reference to mean sea level), on the site; the existing zoning and land use for all contiguous property; and flood protection elevation data and flood zones **delineated, if applicable.**
- (e) Tabulations by acreage and percentage as to the amount of the site that is uplands and wetlands, indicating those wetlands landward and seaward of the mean high-water line (MHWL). ~~Additional related information shall~~ **include**ing the extent and type of wetlands in accordance with the town's comprehensive plan.
- (f) **A scaled drawing delineating** the approximate locations, intensity and acreages of general land uses (proposed), including dwelling types **and units** and general types of nonresidential uses, open spaces, recreational facilities and other proposed uses.
- (g) A traffic impact analysis shall be provided, except for voluntary reconstruction without additional **dwelling or tourism** units, to ensure that the adopted level of service standards are not exceeded before capacity-related improvements are implemented. ~~;~~ **and a scaled drawing delineating a** circulation facilities plan indicating approximate locations and types of proposed streets, bicycle paths, pedestrian walks, and emergency vehicle access points, including all curb cuts, driveways, off-street parking and loading areas and off-street **vehicular** surfaces available for maneuvering **vehicles shall be provided.**
- (h) **Tabulations of** total project acreage and proposed densities for each tourism and dwelling unit type and total number of tourism and dwelling units by type.
- (i) **Tabulations demonstrating compliance with the floor area ratio provisions of section 158.102(C), including** floor area ratios for all land uses and approximate square footage of gross area for all nonresidential buildings by general type (e.g., offices, limited commercial, etc.).

~~Compliance with the floor area ratio provisions of section 158.102(C) shall be demonstrated.~~
