Recommendations for Town Commissioners Goals & Objectives

2015-2016

Goal #

10

It is apparent that the great desirability of Longboat Key has been discovered. As such, the fallout from this mixed blessing has been an enormous traffic issue. We encourage the Town Commission to make all reasonable efforts to mitigate this problem, including the involvement of our neighbors and the authorities, perhaps in an open meeting with all present.

8

The Town Commission should immediately enable the means necessary to allow providers to implement all necessary facilities required for essential, reliable cellular services throughout the key, such as the installation of "dark fiber" in conjunction with the contemplated undergrounding of street utility wiring, including providing the same dark fiber in areas already having underground wire utilities.

2 & 7

Longboat Key is a barrier island with no hospital facilities and minimal medical services. We therefore support the Town Commissioners efforts to continue to provide quality emergency response services.

7 & 8

We encourage the Town Commission to pursue the creation of a Town Center to include among other things a cultural center and a medical facility.

3, 6, 7 & 8

We applaud the Town Commissions efforts to implement, in a timely manner, the development of Bayfront Park to include a viable recreation facility.

7 & 10

We support the continuation of the Longboat key trolley service.

3, 5 & 8

We encourage the Town Commission to continue its efforts to restore the historic balance between the residential and commercial communities as well as the revitalization of aging buildings and infrastructure.

Longboat Key Town Commissioners
501 Bay Isles Rd.
Longboat Key, FL 34228

Dear Commissioners,
At our last Federation Board meeting the attached recommendations for Town Goals and Objectives were approved by all members. I would like to present these recommendations to you at your April 20, 2015 meeting.

Respectfully,

Roger Goldstein
Secretary
